Meeting Adjourned on motion of Mrs. Inch and program was put in charge of Mrs. Ritchie whose Committee had brought us Mrs. Odette Matthias to speak on "The Place of Women in this Modern World."

In introducing her subject Mrs. Matthias began by reviewing the status of women from the cave man to whom her value was to bear sons and to minister to his comfort, thro' Greek agrarian society where she was its backbone and on to Roman women who by law had civil rights but by custom few. During Europe's dark ages she was only a chattel and even in Victorian England her activities were severely limited and at the lower levels she had few rights and little choice of employment. Only in 1843 was she allowed her first formal college education but was not allowed a degree.

B.C.'s Colleges have the highest per capita enrollment in Canada but a low percent of women. On a Russian basis we would have 90 women in House of Commons; Denmark has 14 in ^{every} 179. Ceylon has world's first Premier and in India one third of Congress are women. At world conferences, other women of other countries continually express astonishment at the attitude of Canadian and American women to public life.

The speaker urged that women realize they have a vital part to play in the world's destiny and should develop those attributes which will help them to take their place in moulding public opinion. She cited as faults an intellectual inferiority complex, a lack of discipline necessary to get an education, and the tendency to marry so young as to cut off opportunity for study and the growing of sound, mature judgment based on knowledge. Adults should teach and encourage girls to realize their intellectual capabilities and make them alive to their part in developing the future of our great land.

Mrs. Collas thanked the speaker and tea time followed.

Fruit and Vegetable Marketing Act refers to the Food + Drug Act and covers the poisoning material in processed foods. He explained the various poisons which were responsible for the spoilage of certain foods especially during the hot weather. Great care should be taken in the home processing of foods.

After answering numerous questions asked by the members Mrs Mortimer thanked Dr.

Mc Gregor for a very interesting address.
